INTRO TO PILLBOX, DAILYMED, AND DRUG INFORMATION PORTAL

Hello!

Introduce yourself

Learning Goals:

1. Understand what kind of information PillBox, DailyMed, and Drug Information Portal provide
2. Learn how to navigate and search on these platforms, and how they work together
3. Accomplish a drug search on my own

What is PillBox, DailyMed, and the Drug Information Portal?

DailyMed, PillBox, and the Drug Information Portal are three resources from the National Library of Medicine that provide detailed and accurate drug information for the public. They are meant to be used together, and complement each other.

What are they used for?

- ▶ PillBox is used to identify physical pills that you don't know/don't have the label for
- ▶ Drug Information Portal has comprehensive information on a drug, including current research and studies with the drug
- ▶ DailyMed allows you to search for all marketed drugs in the US, and print out drug labels and use directions

PillBox

 **BOXED WARNING** [\(WHAT IS THIS?\)](#)

SUICIDALITY AND ANTIDEPRESSANT DRUGS

Antidepressants increased the risk compared to placebo of suicidal thinking and behavior (suicidality) in children, adolescents, and young adults in short-term studies of major depressive disorder (MDD) and other psychiatric disorders. Anyone considering the use of paroxetine tablets or any other antidepressant in a child, adolescent, or young adult must balance this risk with the clinical need. Short-term studies did not show an increase in the risk of suicidality with antidepressants compared to placebo in adults beyond age 24; there was a reduction in risk with antidepressants compared to placebo in adults aged 65 and older. Depression and certain other psychiatric disorders are themselves associated with increases in the risk of suicide. Patients of all ages who are started on antidepressant therapy should be monitored appropriately and observed closely for clinical worsening, suicidality, or unusual changes in behavior. Families and caregivers should be advised of the need for close observation and communication with the prescriber.

Paroxetine is not approved for use in pediatric patients. (See [WARNINGS: CLINICAL WORSENING AND SUICIDE RISK](#), [PRECAUTIONS: INFORMATION FOR PATIENTS](#), and [PRECAUTIONS: PEDIATRIC USE](#).)

Presentation design

This presentations uses the following typographies and colors:

- ▷ Titles: **Raleway**
- ▷ Body copy: **Lato**

You can download the fonts on these pages:

<https://www.fontsquirrel.com/fonts/raleway>

<https://www.fontsquirrel.com/fonts/lato>

- ▷ Dark blue **#2185c5**
- ▷ Light blue **#7ecef**
- ▷ Yellow **#ff9715**
- ▷ Magenta **#f20253**
- ▷ Dark gray **#677480**
- ▷ Light gray **#97abbc**

You don't need to keep this slide in your presentation. It's only here to serve you as a design guide if you need to create new slides or download the fonts to edit the presentation in PowerPoint®

SlidesCarnival icons are editable shapes.

This means that you can:

- Resize them without losing quality.
- Change fill color and opacity.
- Change line color, width and style.

Isn't that nice? :)

Examples:

Now you can use any emoji as an icon!

And of course it resizes without losing quality and you can change the color.

How? Follow Google instructions
